LIVE DESIGN PREVIEW

<https://alubo.netlify.app/>

Please open on a DESKTOP browser only

Purpose of This Document

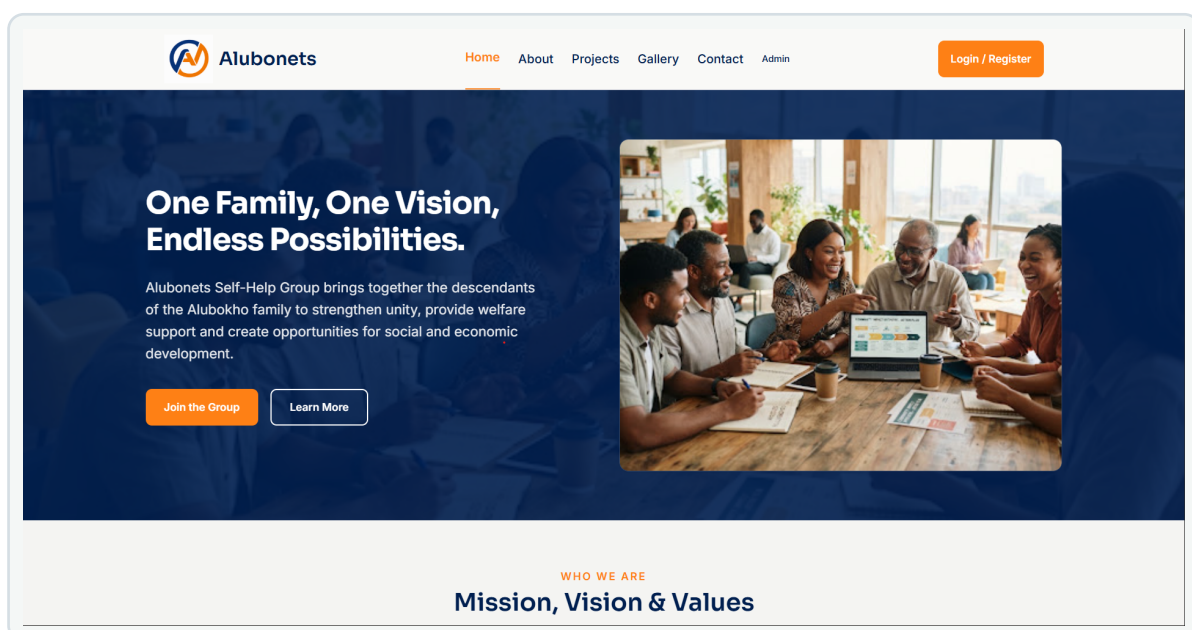

This document presents the design blueprint for the Alubonets Self-Help Group digital platform. The main public pages of the website and a preview of the admin dashboard have been designed and built, and are now live at the preview link above. These pages establish the visual identity, layout structure, navigation and overall user experience that the entire platform — including all member and committee dashboards — will follow. We kindly ask the committee to review the design and confirm that SpectreTech can proceed with full development on this design direction.

What Has Been Built So Far

- **Home** — Hero section, mission/vision highlights, group introduction and calls-to-action.
- **About Us** — Group identity, history, vision, values and governance approach.
- **Projects** — Public listing of group projects and initiatives.
- **Gallery** — Photo showcase of group activities and events.
- **Contact Us** — Contact form and official group contact details.
- **Admin Dashboard (preview)** — A working preview showing the structure and design all other dashboards will follow.

NB — Please Note Before Reviewing:

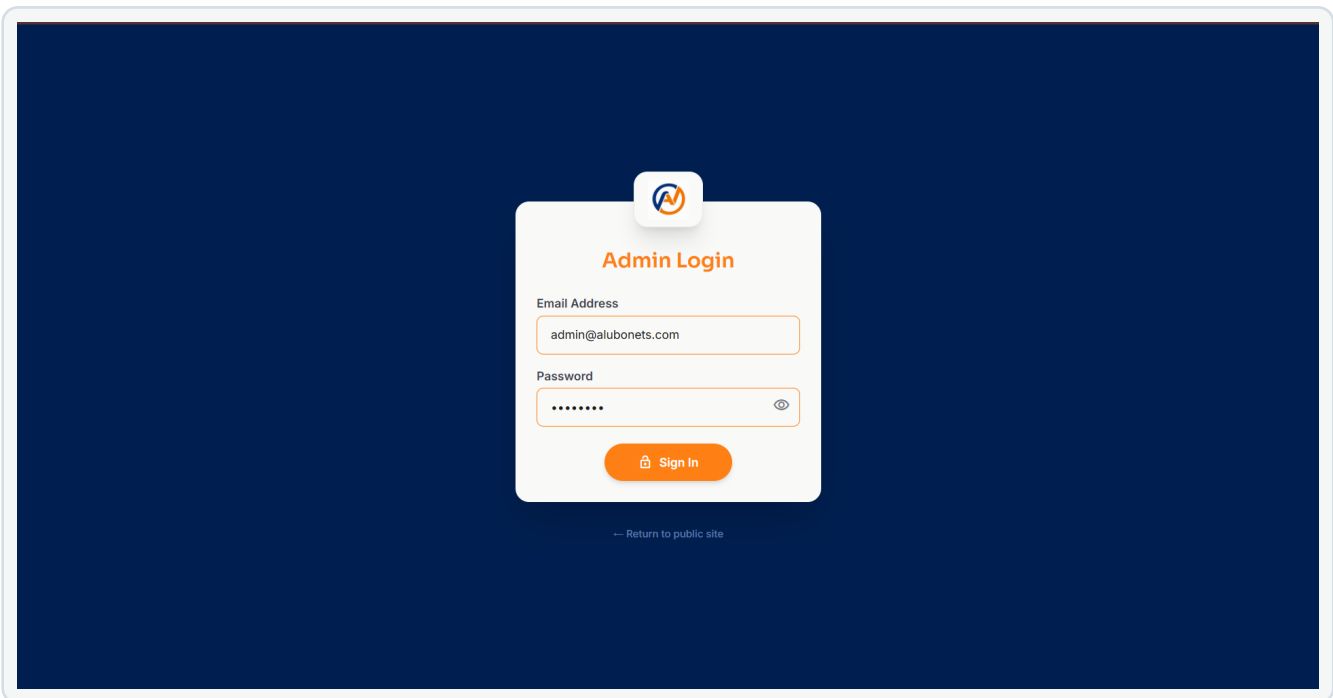

- 1. Desktop viewing only.** The preview link should only be opened on a desktop browser. Mobile responsiveness has intentionally not been implemented yet — doing so now would cause double work if design changes are requested at this stage. Mobile responsiveness will be initiated after the full desktop implementation is complete.
- 2. Filler images.** All images currently used on the platform are placeholder/filler images only. We are waiting for the group's real photos, which will substitute the filler images once provided.
- 3. Not the final design output.** The general design structure will align with what is shown, but major UI enhancements are and will be underway, guided by UI/UX principles, before final shipment.

■ Reviewing the Admin Dashboard

To review the admin dashboard preview, open the **Admin** link in the site navigation and sign in with **any email address and password**. Full authentication and security (account approval, role-based access and two-factor verification) are not yet active — they will be implemented during full development as set out in the Solution Design Document. The dashboard demonstrates the structure, layout and design language that the member, treasurer, secretary, organizer and executive dashboards will all follow.

The Admin Login form is centered on a dark blue background. It features the Alubonets logo at the top, followed by the title 'Admin Login'. Below this are two input fields: 'Email Address' with the value 'admin@alubonets.com' and 'Password' with masked characters. A 'Sign In' button is positioned below the password field. At the bottom, there is a link to 'Return to public site'.

Admin login — sign in with any email and password (authentication not yet active)

The Admin dashboard preview shows a comprehensive interface for managing the organization. It includes a sidebar with navigation links, a top search bar, and a main content area with various widgets.

Dashboard Overview:

- Search:** Search members, reports...
- Navigation:** Dashboard, Pending, Members, Roles & Permissions, Contributions, Projects, Events, Gallery, Documents, Reports, Audit Logs, Settings.
- Dashboard Metrics:**
 - TOTAL MEMBERS: 152
 - ACTIVE: 145
 - PENDING: 7
 - CONTRIBUTIONS: KES 45k
 - EVENTS: 2
- Pending Registrations:**

NAME	PHONE	DATE APPLIED	ACTIONS
Michael Ochieng	+254 712 345 678	Oct 24, 2023	<button>Approve</button> <button>Reject</button>
Sarah Wangari	+254 722 987 654	Oct 23, 2023	<button>Approve</button> <button>Reject</button>
David Kipkorir	+254 733 456 789	Oct 21, 2023	<button>Approve</button> <button>Reject</button>
- Quick Actions:**
 - Announcement
 - Export Members
 - Manage Roles
 - Approve Members
- Member Overview:** View Directory →

Admin dashboard preview — the structural blueprint for all other dashboards

Design System & Colors

The interface follows the approved design system built for trust, warmth and accessibility: generous spacing, large tap targets and high-legibility typography — **Sora** for headings and **Inter** for body text — so members of all ages can use the platform with confidence.

Design system reference — colors, typography (Sora / Inter) and component styling

Delivery Timeline

As per the Solution Design Document, development runs for an estimated **8 weeks** from **11 July 2026**, the date the initial deposit was received and the project commenced. On this schedule the complete platform — public website and secure member portal — is expected to be fully developed, tested and **deployed on or before 5 September 2026**. A significant portion of this period is dedicated to the backend: secure authentication, member records, contributions, finance modules, reporting and dashboards.

Milestone	Detail
Deposit received / project start	11 July 2026
Design blueprint shared for review	13 July 2026
Design confirmation requested from the group	Upon review of this document
Full development, testing & deployment	On or before 5 September 2026 (8 weeks)

Confirmation Requested

We request the Alubonets Self-Help Group committee to review the live preview (on desktop) and this blueprint, and **confirm that the design direction is approved** so that SpectreTech can proceed with the remaining pages, dashboards and backend development on this foundation. Any feedback or adjustments are most welcome at this stage, before full development continues.
